

BASIC CODING

1. Swap two variables with third variables
2. Swap two variables without third variables
3. swap two variables using python
4. swap three variables
5. even odd
6. positive negative
7. leap year
8. int or decimal
9. sqrt
10. pow
11. table to n
12. 1 to n natural numbers
13. 1 to n even numbers
14. 1 to n odd numbers
15. sum of 1 to n
16. sum of square of 1 to n
17. sum of cubes from 1 to n
18. sum of factors
19. count digits
20. sum of digits
21. reverse a number
22. palindrom
23. sum of num and its reverse
24. armstrong
25. diasum
26. factorial
27. product of digits
28. spy number
29. perfect number
30. prime number
31. print first n terms of fibonacci series
32. find a number if it is in fibo series
33. sunny number
34. happy number

ARRAYS AND STRINGS

1. take input line wise and space separated
2. sum of array
3. max element in array
4. min element in array
5. find average of an array
6. sum of all prime numbers in an array
7. count number of prime numbers in an array

8. linear search
9. binary search
10. reverse a string
11. reverse an array
12. selection sort
13. bubble sort
14. sum of pairs == k
15. second highest element
16. second lowest element
17. annagram string
18. s = "I love you" : o/p = "you love I"
19. s = "I love you" : o/p = "I evol ouy"
20. count special character in an array
21. sort an string which contains numbers and characters
22. ASCII value sum
23. s = "abcd" : o/p = 1+2+3+4 i.e., 10
24. s = "abcd" : o/p = zyxw
25. replace a vowel with next vowel and consonent with next consonent
26. s = g3v2k5 o/p = gggvvkkkkk
27. largest number in a string s = ga56ra96v123gk9654v2316k o/p : 9654
28. count vowels in an array
29. sum of even and odd numbers in an array and print their absolute difference
30. remove duplicates from a sorted array
31. print all substrings

HASHMAPS

1. REMOVE DUPLICATES FROM SORTED AND UNSORTED ARRAY
2. REMOVE DUPLICATES FROM STRING
3. COUTING FREQUENCY OF EACH CHARACTER IN STRING
4. REMOVE DUPLICATES
5. FIND DUPLICATES
6. PRINT OCCURANCE OF EACH ELEMENT IN DECENDING ORDER
7. PRINT OCCURANCE OF EACH ELEMENT IN ASCENDING ORDER

MISCELLENOUS QUESTION

1. MAX LENGTH OF A SUBARRAY WHOSE SUM == 0
2. COUNT NUMBER OF PAIRS WHOSE SUM == K
3. GIVEN THE ARRAY IS SORTED FIND IF THE THERE EXISTS A PAIR WITH SUM == k
4. GIVEN THE ARRAY IS SORTED FIND IF THE THERE EXISTS A PAIR WITH PRODUCT == k
5. ROTATE AN ARRAY BY K
6. FACTORIAL USING RECURSSION
7. FIBONACCI SERIES USING RECURSSION
8. GCD USING RECURSION OR HCF
9. TOWER OF HANOI WITH 4 VARIABLES
10. IF A NUMBER IN FIBO USING RECURSSION
11. GCD USING RECURSION OR HCF

12. TOWER OF HANOI WITH 4 VARIABLES
13. IF A NUMBER IN FIBO USING RECURSSION

TCS NQT

ARRAYS

1. Find the smallest element in an array
2. Find the Largest element in an array
3. Find Second Smallest and Second Largest Element in an array
4. Reverse a given Array
5. Count frequency of each element in the array
6. Rearrange array in increasing-decreasing order
7. Calculate Sum of the Elements of the Array
8. Rotate array by K elements : Block Swap Algorithm
9. Average of all the elements in the array
10. Find Median of the given Array
11. Remove Duplicates in-place from Sorted Array
12. Remove Duplicates From an Unsorted Array
13. Adding Element in an Array
14. Find all repeating elements in an array
15. Find all the non-repeating elements in an array
16. Find all Symmetric Pairs in the array of pairs
17. Maximum Product Subarray in an Array
18. Replace elements by its rank in the array
19. Sort Elements of an Array by Frequency
20. Rotate array by K elements
21. Finding Circular rotation of an array by K positions
22. Finding Equilibrium index in an array
23. Sort an array according to the order defined by another array
24. Search an Element in an Array : Program CPP Java
25. Check if array is subset of another array

NUMBERS

1. Check if a number is Palindrome or Not
2. Find all Palindrome Numbers in a given range
3. Check if a number is prime or not
4. Prime Numbers in a given range
5. Check if a number is Armstrong Number or not
6. Check whether a number is Perfect Number or not
7. Check whether a given number is even or odd
8. Check whether a number is positive or negative
9. Sum of first N Natural Numbers
10. Find Sum of AP Series
11. Program to find Sum of GP Series
12. Greatest of two numbers

13. Greatest of three numbers
14. Check if given year is a leap year or not
15. Reverse digits of a number
16. Maximum and Minimum Digit in a Number
17. Print Fibonacci Series up to Nth term
18. Factorial of a Number : Iterative and Recursive
19. Calculate the Power of a Number : Binary Exponentiation
20. Factors of a Given Number
21. Print all Prime Factors of the given number
22. Check if a number is a Strong Number or not
23. Check if a number is Automorphic Number
24. Find GCD of two numbers
25. Find LCM of two numbers
26. Check if the given number is Harshad(Or Niven) Number
27. Check if the number is an abundant number or not
28. Sum Of Digits of A Number
29. Find the sum of numbers in the given range
30. Permutations in which N people can occupy R seats
31. Program to Add two fractions
32. Replace all the 0's with 1 in a given integer
33. Express given number as Sum of Two Prime Numbers
34. Calculate the Area of the Circle
35. Program to Find Roots of a quadratic equation

NUMBER SYSTEM

1. Convert Binary to Decimal
2. Convert Binary to Octal
3. Convert Decimal to Binary Number
4. Convert Decimal to Octal
5. Convert Octal to Binary
6. Convert Octal to Decimal
7. Convert digits/numbers to words

SORTING

1. Bubble Sort Algorithm
2. Selection Sort Algorithm
3. Insertion Sort Algorithm
4. Quick Sort Algorithm
5. Merge Sort Algorithm

STRINGS

1. Check if the given String is Palindrome or not
2. Count number of vowels, consonants, spaces in String
3. Find the ASCII value of a character
4. Remove all vowels from the String

5. Remove Spaces from a String
6. Remove characters from a string except alphabets
7. Reverse a String
8. Remove brackets from an algebraic expression
9. Sum of the Numbers in a String
10. Capitalize first and last character of each word of a string
11. Calculate Frequency of characters in a String
12. Find Non-repeating characters of a String
13. Check if two Strings are anagrams of each other
14. Count common sub-sequence in two strings
15. Check if two strings match where one string contains wildcard characters
16. Maximum occurring character in a string
17. Remove All Duplicates from a String
18. Print all the duplicates in the string
19. Remove Characters from first String present in the Second String
20. Change every letter with next lexicographic alphabet
21. Find the largest word in a String
22. Write a program to sort characters in a string
23. Count the number of words in a given string
24. Find word with highest number of repeated letters in string.
25. Change case of each character in a string
26. Concatenate one string to another
27. Find the Position of a Substring within a String
28. Reverse Words in a String

Problems On Arrays

- Find the smallest number in an array
- Find the largest number in an array
- Find the second smallest and second largest element in an array
- Reverse a given array
- Count the frequency of each element in an array
- Rearrange the array in increasing-decreasing order
- Calculate the sum of the elements of the array
- Rotate an array by K elements - Block Swap Algorithm
- Find the average of all elements in an array
- Find the median of the given array
- Remove duplicates from a sorted array
- Remove duplicates from an unsorted array
- Add an element in an array
- Find all repeating elements in an array
- Find all non-repeating elements in an array
- Find all symmetric pairs in an array
- Find the maximum product subarray in an array
- Replace each element of the array by its rank in the array
- Sort the elements of an array by frequency
- Rotate the elements of an array (left and right)
- Find the equilibrium index of an array
- Find the circular rotation of an array by K positions
- Sort an array according to the order defined by another array
- Search for an element in an array
- Check if an array is a subset of another array or not

Problems On Strings

Check if a given string is palindrome or not
Count number of vowels, consonants, spaces in String
Find the ASCII value of a character
Remove all vowels from the string
Remove spaces from a string
Remove characters from a string except alphabets
Reverse a String
Remove brackets from an algebraic expression
Sum of the numbers in a String
Capitalize first and last character of each word
Calculate frequency of characters in a string
Find Non-repeating characters of a String
Check if two strings are anagram of each other
Count common sub-sequence in two strings
Check if two strings match where one string contains wildcard characters
Return maximum occurring character in the input string
Remove all duplicates from the input string.
Print all the duplicates in the input string.

More Questions to Practice on Strings.

- Remove characters from first string present in the second string
- Change every letter with the next lexicographic alphabet in the given string
- Write a program to find the largest word in a given string.
- Write a program to sort characters in a string
- Count number of words in a given string
- Write a program to find a word in a given string which has the highest number of repeated letters
- Change case of each character in a string
- Concatenate one string to another
- Write a program to find a substring within a string. If found display its starting position
- Reverse words in a string
